Immunochemical Fecal Occult Blood Test

Results as soon as **1 min**

- ✔ **Cleared in US and EU for professional/CLIA/OTC**
- ✔ **Over 99% accuracy**
- ✔ **No diet restriction**

The iColon™ iFOB Test (Immunochemical Fecal Occult Blood Test) is a qualitative immunoassay for detecting Fecal Occult Blood. It is intended for professional use and over-the-counter use (at-home use). Measurement of FOB is helpful as an aid to detect human blood in the stool as found in a number of gastrointestinal disorders, e.g., diverticulitis, colitis, polyps, and colorectal cancer.

- **Specimen:** Fecal
- **Sensitivity:** 50 ng/ml
- **Intended Use:** Cleared in US and EU for professional/CLIA/OTC
- **Storage:** Room temperature (15°C to 30°C/59°F to 86°F)
- **Shelf life:** 24 months from the date of manufacturing

Easy to use Step 1: Prepare stool specimen Step 2: Perform the test and read results
